

Job Title: Security Systems Engineer

Summary: An exciting opportunity for an experienced Security Systems Engineer to join a busy team dealing with installation, maintenance and repairs to electronic security systems.

Location: Hull, HU3 1HD

Salary: Annual starting salary c. £28,000 – £33,000 (OTE £35,000 - £45,000). Remuneration will be discussed at interview stage and will be dependent upon relevant industry experience.

Benefits: Unlimited overtime opportunities; call out allowance; fully fuelled car/van; death in service policy; company subsidised pension scheme; flexible working arrangements; mobile phone.

Company Profile: We are a leading Electronic Security Systems Company specialising in the design, installation, repair and maintenance of CCTV, Door Entry/Access Control, Warden Call and Concierge Systems and Fire/Intruder Alarms on behalf of clients throughout the UK.

Job Profile: The successful Engineer will be a solid all-round engineer with strong experience of CCTV and Electronic Security Systems including Door Entry, Access Control, and Intruder Alarms. You must possess sound knowledge of current standards and legislation and able to demonstrate recent relevant experience. You will be responsible for servicing, maintenance, installations, fault finding, rectification and problem solving, commissioning, and documenting for a wide range of Public Space CCTV and electronic security systems.

Qualifications: You will be a multi-skilled engineer with a minimum of 3 years previous experience within the industry and have demonstrable experience on a range of CCTV and electronic security systems. The ability to cover a 24-hour call-out on a rota basis is essential to be considered for this position.

You will be required to service the company's product portfolio for existing and new business and provide support to clients as and when required.

Candidate Profile: You must be a solid all-round engineer possessing a professional and positive attitude to work. You should have excellent customer relationship management with excellent verbal and written communication skills. You should be confident and highly motivated with strong problem-solving abilities.

You must be quality focussed with a keen attention to detail and be willing to work independently or as part of a dedicated engineering team have a flexible approach to work. You will need a full UK driving licence.

On commencement of employment you will be required to provide evidence of all skills and competences including qualifications and will be required to complete Security Screening in line with BS7858 and undertake an enhanced DBS check.

Application Details: Please submit an up-to-date CV and covering letter including current salary details to jobs@bcsl.uk.com.

WE REGRET WE CAN ONLY ACCEPT APPLICATIONS FROM PERSONS AUTHORISED TO LIVE AND WORK WITHIN THE UK.
